SUMMARY

Passionate Python Full Stack AI Developer with hands-on experience in building scalable web applications and integrating Generative AI into real-world products. Experienced in developing AI-powered educational platforms, chatbot systems, and intelligent web applications using Django, Python, Large Language Models (LLMs), and Retrieval-Augmented Generation (RAG).

Strong understanding of backend development, REST APIs, cloud deployment, vector databases, prompt engineering, and production deployment on AWS. Passionate about creating AI-driven solutions that improve learning experiences and automate complex workflows.

EDUCATION

Master of Computer Applications (MCA), Online

Bachelor's Degree, (Add university, year, and percentage/CGPA)

EXPERIENCE

Python Full Stack Developer

Key Responsibilities

- Designed and developed scalable web applications using Django.
- Built AI-powered educational platforms integrating Large Language Models.
- Developed REST APIs for frontend and AI integrations.
- Integrated Google Gemini APIs into production applications.
- Designed database schemas and optimized SQL queries.
- Implemented SEO features including dynamic slugs, Open Graph metadata, JSON-LD structured data, and XML sitemaps.
- Deployed Django applications on AWS Linux EC2 instances.
- Configured production-ready deployment using Gunicorn and Nginx.
- Optimized AI token usage and reduced API costs.
- Worked on backend architecture, authentication, and database management.

PROJECTS

AI Tutor Platform | Developed an AI-powered learning platform capable of answering technical questions using Large Language Models. The platform provides interactive learning experiences for programming and technology courses.

- Technologies: Python • Django • Gemini API • RAG • ChromaDB/Qdrant • AWS • MariaDB
- AI-powered tutor
- Context-aware question answering
- Prompt engineering
- RAG-based knowledge retrieval
- Technical course management
- SEO optimization
- Secure authentication
- AWS deployment

AI Resume Builder & Career Platform | Developed AI-assisted features for resume generation and career guidance, enabling users to create professional resumes with AI-generated suggestions.

- Technologies: Python • Django • AI APIs

Agile Project Management System | Built a project management platform supporting issue tracking, daily updates, email integration, data import/export, and AI-assisted workflows.

- Technologies: Python • Django • MariaDB • Bulma CSS

TECHNICAL SKILLS

Python
JavaScript
HTML5
CSS3
SQL
Django
Django REST Framework
FastAPI
HTML
CSS
Bootstrap
Bulma CSS
Generative AI
Large Language Models (LLMs)
Google Gemini API
Prompt Engineering
Retrieval-Augmented Generation (RAG)
Embeddings
Vector Search
AI Chatbot Development
ChromaDB
Qdrant
MariaDB
MySQL
PostgreSQL (Basic)
AWS EC2
Linux
Gunicorn
Nginx
Git
GitHub
REST APIs
JSON
Docker (Learning)
Postman

CERTIFICATIONS

(Add if applicable)

Python

Django

AWS

Generative AI

Google Cloud / Microsoft / OpenAI Certifications

AI EXPERTISE

- AI Application Development - Prompt Engineering - Retrieval-Augmented Generation (RAG) - Embedding Generation - Vector Database Integration - AI Chatbot Development - LLM API Integration - Token Optimization - AI Cost Optimization - Context Management - Production AI Deployment

STRENGTHS

- Strong problem-solving skills - Quick learner - Backend architecture design - AI solution development - Clean and maintainable code - Continuous learning mindset - Production deployment experience

AREAS OF INTEREST

- Artificial Intelligence - Generative AI - Backend Development - Cloud Computing - Large Language Models - Software Architecture - AI Agents - Production AI Systems
